Guide to Project

- 1. Install Python
- 2. Install MySQL
- 3. Install MySQL Python Connector
- 4. Implement the backend commands
- 5. Download all the Python files in the same directory
- 6. Open Main.py and run it

```
hain.py - C:\Users\G\OneDrive\Desktop\CS_Project\Main.py (3.6.8)
File Edit Format Run Options Window Help
import Admin
                                  r Table, Transaction Table, Loan Table, Id Verification Table
                Python Shell
                Check Module Alt+X
               Run Module F5
print("\n\t\t
                                 ***************************
print("Welcome to A&D Post Office Bank!\n")
print("Please login to continue with the program\n")
Admin Login Table.login()
while True:
